Responsive Design	

Experience

Apr 2022 — Oct 2022

Freelance

Gained practical experience managing websites during six months of freelance work. Handled various tasks and projects, ensuring websites met client specifications.

March 2023 — Present

Product Designer at The Potato Studio

During my tenure at The Potato Studio, I honed a comprehensive skill set in product design, covering UX audits, user research, competitor analysis, UI design, prototyping, and more. My expertise extends to interaction design, usability testing, and seamless collaboration with developers. I also possess proficiency in After Effects and Jitter animation. Additionally, I have experience in designing complex dashboards and structuring information hierarchies, particularly within SaaS sectors. I'm eager to apply these skills and my track record of impactful design contributions to your team.
